

## Music technology / electronic music Resource suggestions for schools and families

**NB this resource sheet will be updated on a regular basis – please keep checking**

### Songwriting projects for I pads

From Transformance music:

We would like to contribute in a small way to the task facing teachers, parents and carers by offering our '[Teaching Music with Garageband for iPad](#)' resource for free/donation to all schools and homes.

The resource consists of a series of fun and accessible songwriting projects suitable for ages 7-16, covers much of the KS2/3 music curriculum, and contains video guides that allow pupils to work alone or with an adult. It is a perfect resource for one-to-one work at home, or small group work in schools.

### **Beginner Garageband Tutorial (iPhone and Tablet)**

Garageband is a simple Software app which is already on most iPhones and Tablets out of the box. It allows you to play virtual instruments in real time, record your ideas and match it up with some professional sounding loops, and is accessible for younger children too. Whilst there is some great courses out there for people who are already semi-proficient, below I have provided a nice intro to the app that covers all the necessary basics. So try it out today and I'm sure you will be surprised by the endless amount of time you will get out of it!
